Summary

Experienced Odoo developer with a Master's degree in Computer Science, specializing in Data Engineering and Web Technologies. Skilled in customizing Odoo 17 modules for HR and timesheet management, creating advanced dashboards, and resolving technical issues such as security errors and data integrity. Highly motivated to apply my problem-solving abilities and technical expertise in a dynamic and challenging role.

Expérience

Odoo Developer

Wissal Group, Sétif, Algeria

July 2024 - July 2025

- Developed a full project management solution on Odoo v16, including customization of default modules, modern user interfaces, and tailored email templates, and successfully migrated it to v17 while working independently.
- Built an innovative inter-company transfer module, covering stock, sales, purchase, delivery, and receipt flows, optimizing logistics operations.
- Contributed to a WCM solution with specific customizations and role management, ensuring smooth integration with existing processes.
- Exported and imported data for various projects, performing thorough data cleaning to ensure consistency and accuracy.
- Designed custom reports, including detailed financial analyses and interactive dashboards to support decision-making.
- Wrote clear user guides and presented technical solutions to facilitate the adoption and maintenance of custom modules.
- Created tailored dashboards with real-time data visualizations for tracking project and resource performance.

Database Administrator (DBA)

Wissal Group, Sétif, Algeria

May 2024 - July 2024

- Created and configured database users with specific roles, ensuring secure access management.
- Configured PgBouncer to optimize PostgreSQL connections, implementing advanced pooling with dynamic pools based on workload and custom timeout settings for improved performance.
- Set up PostgreSQL with streaming replication and intelligent table partitioning for faster queries, while monitoring performance using system views.
- Implemented **auditd** to enhance database security, logging critical access and data modifications with detailed audit trails.
- Developed shell scripts to automate administrative tasks and configurations.

Education

Baccalaureate in Mathematics

Fatima Zahra High school, Sétif, Algeria 2018

Diploma in graphic design

Grande école, Sétif, Algeria 2019

Bachelor's in Computer Science

University Farhet Abbas, Sétif, Algérie 2021

Master's in Computer Science (Data Engineering & Web Technologies)

University Farhet Abbas, Sétif, Algérie 2023
